

EAI Endorsed Transactions on Creative Technologies

Editor-in-Chief

Matei Mancas

Matei MANCAS has an Audiovisual Systems and Networks engineering degree (Ir.) from ESIGETEL Engineering School, France, and a MSc. degree in Information Processing from the University of Paris XI (Orsay). He holds a PhD in applied sciences from the Engineering Faculty of Mons (FPMs), Belgium since 2007. He made several research visits abroad as in La Sapienza University in Rome, Italy and IRISA-INRIA in Rennes, France.

He is now a senior researcher and project leader at the Numediart Institute of the University of Mons, the institute of new media arts technologies where he acquired several years of experience with different projects involving together engineers, artists and people from creative industries. Matei is the organizer of several meetings of EU IP and COST projects and TPC and PC member of several conferences. He is also a member of the Management and Steering Committee of a COST Action and he is a representative of the researchers in the Board of Directors of the University of Mons.

Matei's research is about Smart Rooms and more precisely the analysis and modeling of human attention with applications to creative industries like TV, web and advertising.

Special Issues Editor

Manik Sharma

is MCA, UGC-NET qualified and has received his Ph.D. degree in "Distributed Query Optimization". He has more than 12 years of teaching experience. He has worked as a head of department of Computer Science and Application at Sewa Devi SD College Tarn Taran. Additionally, he has also acted as an officiating principal at Sewa Devi SD College Tarn Taran. Currently, he is working as an Assistant Professor in the department of Computer Science and Applications at DAV University Jalandhar, India. His main research work focuses on query optimization, data mining, soft computing and machine learning. He has also published 04 books related to Computer Network, Internet Applications, Management Information System and Database Theory. In addition, he has published 20 research papers in various journals of International repute including Scopus and Thomson Reuters. He also presented more than ten

research articles in various national and international UGC and IEEE conferences. Besides, he has given several talks on query optimization, data mining and health informatics. Moreover, he is an active member of several International Program Committee, Technical Program Committee, and Advisory Committee of several academics conferences (United Kingdom, Singapore, Mauritius, Thailand, Vietnam, USA, Hong Kong, Canada, UAE, and India).
