Rokhmat Taufiq Hidayat	Polytechnic of State Finance STAN, Indonesia
Rahadi Nugroho	Polytechnic of State Finance STAN, Indonesia
Akhmad Khabibi/	Polytechnic of State Finance STAN, Indonesia
Bagas Johantri	Polytechnic of State Finance STAN, Indonesia

Preface

We are honored to present the international proceedings of the first edition of the **Public Sector International Conference (PSIC) 2024**, held on September 11 - 12, 2024, in Lombok, Indonesia. This conference represents a significant milestone as the first international gathering hosted by PKN STAN since 2019. Co-hosted by Universitas Terbuka and Universitas Mataram, with the support of esteemed sponsors such as the Asian Development Bank Institute, BPD LH, BPD PKS, and BPK RI, PSIC 2024 exemplifies a collaborative effort to advance knowledge and foster innovation in public sector finance and development.

The conference's theme, "**Creative Local Finance to Achieve Sustainable Development Goals (SDGs) 2030**," reflects the critical role of financial innovation in addressing contemporary challenges. As the world grapples with the enduring impacts of the COVID-19 pandemic, the intensifying effects of climate change, and increasing geopolitical tensions, this theme underscores the urgency of mobilizing local financial mechanisms to empower communities and support sustainable development.

PSIC 2024 offers a platform for meaningful dialogue and knowledge exchange among academics, researchers, policymakers, and practitioners from diverse backgrounds. Through international seminars, a call for papers, and over 50 parallel session presentations, the conference highlights emerging trends and best practices in local finance and sustainability. Participants have the opportunity to explore innovative approaches such as community investment funds, microfinance initiatives, and local currency systems, showcasing their potential to drive grassroots change while fostering local ownership and resilience.

The importance of sustainable development is central to the discussions at PSIC 2024. It is not only about protecting the environment but also addressing social inequalities, enhancing community welfare, and promoting stable economic growth. Sustainable development requires the wise management of natural resources, the reduction of pollution, and the preservation of ecosystems to ensure a high quality of life for future generations. Simultaneously, it must create sustainable employment opportunities and encourage innovation to drive long-term economic progress.

Recognizing the public sector's pivotal role in achieving the SDGs, the conference emphasizes the need for strong regulatory frameworks and strategic investments in infrastructure and technology. Public-private partnerships are highlighted as a means to align financial and sustainability goals, leveraging the combined strengths of government and industry. By fostering collaboration across disciplines and sectors, PSIC 2024 aims to catalyze impactful change and contribute to a more inclusive and sustainable global community.

This collection of proceedings captures the breadth of ideas and insights shared during the conference. It is our hope that these contributions will inspire further research and innovation in public sector finance and sustainable development. We extend our deepest gratitude to all participants, speakers, sponsors, and organizing partners for their invaluable support and dedication.

Finally, we thank the Regional Government of West Nusa Tenggara and West Lombok Regency for their hospitality and for providing an exceptional atmosphere for this important event. May PSIC 2024 serve as a lasting inspiration for collaboration, innovation, and progress in achieving the SDGs.

Warm regards,
Evy Mulyani
Chairperson, PSIC 2024

Contents
