Preface

With great enthusiasm, I welcome you to the proceedings of the 1st International Conference on Wetland for Sustainable Development Goals (ICWSDGs). Wetlands are among the most vital yet vulnerable ecosystems on our planet, playing a crucial role in biodiversity conservation, climate regulation, and sustaining livelihoods. This conference has brought together brilliant minds from across the globe—researchers, practitioners, and policymakers—who share a common goal: to deepen our understanding and strengthen our commitment to wetland conservation. The papers in this volume showcase groundbreaking research, innovative solutions, and insightful discussions that will contribute to the future of these precious ecosystems.

The success of this conference would not have been possible without the dedication and contributions of many. I extend my heartfelt gratitude to all authors, reviewers, and participants who have shared their expertise and perspectives, making this event a dynamic and meaningful exchange of knowledge. Their efforts remind us that the challenges we face in wetland conservation are complex but surmountable when we work together. These proceedings reflect the spirit of collaboration and serve as a testament to our collective commitment to safeguarding wetlands.

I also want to acknowledge the organizing committee, sponsors, and supporting institutions for their unwavering support. These proceedings will serve not only as a vital academic resource but also as a catalyst for action in research, policy, and on-the-ground conservation efforts. Together, we will ensure that wetlands thrive for generations to come.

Prof. Sunardi, S.Si., M.Sc., Ph.D
