Abstract. The research aimed at developing context, input, and product between Private Senior High School of Sport and Student Education & training Center. The method used CIPP design where students, teachers, coaches, and supervisors as the subjects. The data tabulation technique used observation technique, interview, questionnaire, and documentation. By conducting data reduction, data presentation, and conclusion, then they were analysed. The result of the coaching showed 1) the contexts had conformity between its vision, mission, and goal that wanted to be achieved, 2) the input was equipped with the availability of training planning documents and program guidelines, 3) the process was well-scheduled for the athletes by the coach 4) the product could increase the quality of athletes. In sum, there were weaknesses and flaws related to the success of both research sites. The very basic factual problem lies in the lack of good coordination between agencies and sports stakeholders in Lampung.

Keywords: coaching, sport, education, training

1 Introduction

National sports management is still less effective and less efficient. There is still no continuity between one sub-system with another sub-system in the context of long-term guidance (8-12 years). In addition, the foundation of sports development such as the national sports competition system still cannot be implemented properly. Even though sports competition is the root of sports coaching to improve the competitiveness of national sports [1].

The implementation of education by considering the development of intelligence, talents’ growth and students’ talent is the mandate of law that must be upheld both by the Central Government and the Regional Government. Lampung Province is one of the provinces whose vision and mission in education both formal and informal is in accordance with the law. One of them is by manifesting the establishment of training centers, training for gifted students and sport schools to develop the development of potential students in improving achievement in the sports field, fulfilling the capacity of students who have talent in the sports and the implementation of Private Senior High School of Sport and Student Education & training Center development [1].
Government’s efforts are very factual to provide special education services for students with inner capacity, intelligence, special talents, and ability by establishing Private Senior High School of Sport and Student Education & training Center. It is a big idea that must be done with careful planning and calculation. In other words, system design and programs that begin with a need analysis, blueprint design or program prototype, including the master plan for the development of gifted children education need to be done. The results of the design and development were tested and then revised before officially implemented in Private Senior High School of Sport and Student Education & training Center in Lampung [2].

The head of Lampung Secondary and Higher Education Division stated that the Sports Cultivation School is needed in the region because this area has huge potential athletes, but they are not well educated and trained. Therefore, the presence of the school as well as the training center is expected to bring new athletes in various sports that can bring and raise the name of this area in various sports events.

The formation background of Private Senior High School of Sport in the beginning sports training, especially students, was carried out by the Regional Office of the Ministry of National Education [2], but after regional autonomy responsibility was given to the Regional Education and Culture Office. Through the sports field, good potential areas are given the authority to form Private Senior High School Lampung. The sport branches that include in Private Senior High School of Sport are depending on the potential of superior sports there.

The Private Senior High School of Sport and Student Education & training Center are pioneer programs for long-term training in sports achievements in Lampung Province. Private Senior High School of Sport and Student Education & training Center are not running as they should be yet, but the forerunner of accomplished athletes began to develop which cannot be detached from the concept of adequate learning.

There are still a lot of various problems in sports education & training at Private Senior High School of Sport and Student Education & training Center in Lampung. Regarding the length of time for the establishment of gifted school sports in Lampung Province, it indicates that sports education and training program in Lampung Province has not run optimally. The problem is the low level in needs of students for sports education and training. Among Lampung residents, there is still the impression that sports education and training are only the property of the people with sufficient economic level because of the high cost. In fact, the success of sports education and training requires the support of all parties, both middle and lower economic communities and above.

2 Methods

2.1 Research Design
