Preface

This conference carries the theme “Public Policy for Environmental Sustainability and Climate Change”. This theme is not only relevant but also crucial in our efforts to ensure a greener, healthier, and more sustainable future. In this era, we realize that environmental issues and climate change are no longer just topics of discussion but have become real challenges faced by all countries. We see the impacts in the form of increasingly frequent natural disasters, changes in ecosystems, and risks to human welfare in the future. Therefore, this conference is here to bring together experts, practitioners, and policy makers from various backgrounds to share ideas and solutions.

We need to convey that on this occasion, we received at least 32 articles to be presented in parallel presentations and will be presented in the form of proceedings as an output that we always present at every ICAS activity that we have held in the last 6 years. We hope that through this activity, we can produce scientific studies for concrete and implementable public policies. Hopefully, these policies will bring us one step closer to better environmental maintenance and effective climate change mitigation.

Finally, we would like to express our appreciation to all parties who have supported the implementation of this event, both the committee and all participants who attended. We also apologize for any shortcomings in the organization of this event. May this conference bring great benefits to all of us and become a milestone in our struggle to face environmental challenges and climate change.

Dr. Nur Afandi, SPd, MT

Contents

Innovations in Human Resource Management to Support Green Economy Transitions in Public Administration <i>Septiana Dwiputrianti, Teni Listiani, Halimah Mohd Yusof</i>	1
